

Restricted Axle Weights

5 ton road..... Steering = 10,000 pounds Tandem = 18,889 pounds

7 ton road..... Steering* = 14,000 pounds Tandem = 26,444 pounds

9 ton road..... Steering* = 18,000 pounds Tandem = 34,000 pounds

***Important:** Tire size and ratings may not allow the maximum axle weight; especially if there are single tires on each wheel. In those cases, the tire size and rating would determine the axle weight. Gross weight cannot exceed the maximum allowable weight determined by the Minnesota Gross Weight Table (determined by the distances between axles).
