

**Restricted Axle Weights**

5 ton road..... Steering = 10,000 pounds    Last 3 axles = 23,889 pounds

7 ton road..... Steering\* = 14,000 pounds    Last 3 axles = 33,444 pounds

9 ton road..... Steering\* = 18,000 pounds    Last 3 axles = 42,000 pounds

**\*Important:** Tire size and ratings may not allow the maximum axle weight; especially if there are single tires on each wheel. In those cases, the tire size and rating would determine the axle weight. Gross weights cannot exceed maximum allowable weights on the Minnesota Gross Weight Table...(determined by axle spacing).
